

Name: _____

What's In an Income?

What is income? Income is the money that someone gets from a salary, wages, and other sources. Most adults work to earn income. A person who works for a business or a boss is called an employee. The person that he or she works for is called the employer. Employers pay employees a salary. This fixed amount of money is paid to an employee on a regular basis. Some jobs have higher salaries than others. On average, jobs that require more schooling or training have higher salaries than those that require very little education. When you think about your future and dream about your income, remember that what you *learn* may affect what you *earn*.

What's In an Income?
